

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: September 12, 2008

Water Body Under Evaluation:

Water Body ID #: 0035
Name: Bob's Creek (Class C)
Length of Segment: 12.5 miles
County(ies): Lincoln

Use Attainability Analysis (UAA) Study:

UAA ID #: 0572
Submitter: Applied Environmental Solutions (AE Solutions) for Pickett, Ray & Silver
Date(s) Conducted: May 7, 2007
Date Received: June 5, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. No interviews were conducted in 2007. However, those conducted during a 2005 UAA (rec.12/2/05) revealed existing WBCR and Secondary Contact Recreation (SCR). One comment was received during the public comment period of May 21-August 31, 2008, which also cited WBCR and SCR.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 1 of the 3 sites evaluated. Interviews conducted during a 2005 UAA revealed both WBCR and SCR uses, as did written public comments received in 2005. Due to meeting the depth criterion and documented existing uses, the committee recommends the WBCR use designation be retained. Due to documented secondary contact uses, the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
